GARY COOPERBERG

"Indications of Advancement of the
Process of Biblical Redemption"

While most people tend to relate to Israel as a political entity, Cooperberg relates to it as a completely Biblical process which is destined to affect all of humankind. Unlike most others, who fear for the survival of Israel, he fears for the survival of the United States. For today, nations are being judged by how they relate to the G-dly process of Jewish Return to their ancient homeland. It is clearly the beginning of the Redemption of all of humankind. When Israeli leaders err in judgment, they bring needless tragedy to our homeland. But, in spite of the suffering we are forced to endure, we have a guarantee from our Creator that this country will never fall again. Such a guaranteed does not exist for any other country.
